NRAs coordination on REMIT investigations
ACER’s perspective

Antonio Santos

Team Leader of the Market Conduct Team – Market Surveillance and Conduct Department
The views expressed in this presentation are the views of the speaker and do not necessarily reflect the views of the Director, or of the Agency for the Cooperation of Energy Regulators, or of any of its Boards.

The Agency for the Cooperation of Energy Regulators does not guarantee the accuracy of the data included in this presentation and accepts no responsibility for any consequence of their use.
The mandate

The tools

The example

The challenges
The mandate: ACER shall aim to ensure coordination and consistency

‘The Agency shall aim to ensure that NRAs carry out their tasks under this Regulation in a coordinated and consistent way.’ – Article 16 (1) of REMIT

Market monitoring by ACER

- Market monitoring by NRAs (optional)
- Automatic screening of data
- Initial assessment and analysis

Cooperation and coordination by ACER

- Investigation of suspected breaches
- Enforcement by NRAs

Market monitoring by NRAs (optional)
The tools: Eight main tools with different reaches and impacts

Two wide range tools:

• ACER Guidance
  ✓ ACER Guidance
  ✓ Guidance Notes

• Coordination meetings on REMIT case investigations
  ✓ ACER/NRAs
    ✓ 1:Many – REMIT Coordination Group (4/year)
    ✓ 1:Many - Market Monitoring Standing Committee (5/year)
  ✓ ACER/ESMA/Financial regulators
    ✓ 1:Many – Energy Trading Enforcement Forum (1/year)
Six targeted tools (four in use):

- Case updates
  - ✓ 1:1 ACER/NRA meetings on cases
  - ✓ Case related workshops
  - ✓ Follow-ups on notifications
- Cross notifications
- Request NRAs any information related to the suspected breach
- Request NRAs to commence an investigation of the suspected breach
- Establishment and coordination of investigatory groups
  - Support NRAs on REMIT investigations

Due to the chronical lack of HR to implement REMIT these two tools are not used currently by ACER as they are HR intensive
The example: Coordination on two transmission capacity hoarding cases

• The type of behaviour
  ✓ Acquisition of all or part of the available transmission capacity without using it or without using it effectively

• The context
  ✓ Continuous electricity intraday markets
  ✓ Transmission capacity is priced implicitly at zero

• The problem
  ✓ harms the use of cross-border interconnectors to deliver economically efficient outcomes
  ✓ reduces the scope for competition in one or more connected wholesale energy markets
  ✓ prevents energy prices from converging
The example: Coordination on two transmission capacity hoarding cases

• **The start**
  - First reports of the behaviour by Energy Exchanges (PPATs) – 2015
  - Further events identified by NRAs - 2015

• **The current status**
  - Two Decisions imposing sanctions were issued
  - ACER implemented two alerts that cover the behaviour in its market surveillance system
  - Several alerts shared with NRAs on the behaviour ever since
• What did you see?

✓ The referral of the two cases for enforcement by the Danish Utility Regulator (DUR) to the Public Prosecutor coincided with ACER’s issuance of the Guidance Note on the behaviour of transmission capacity hoarding

✓ DUR and ACER coordinated the press releases once the Decisions were taken – Published the same day with coordinated text

But, ... there is significant work behind the scenes from the NRA and ACER side to make it happen ...
### How did we get there?

*PPAT - Person Professionally Arranging Transactions*
The challenge: ACER’s limited mandate coupled with lack of resources

A fragile ecosystem to ensure consistency:

• ACER – A mandate of means (‘aim’) with insufficient resources

• NRAs – New area, limited staff, and increasing number of cases

• New provision on support on investigations by ACER but no additional resources allocated
