

Dear Madam,

Dear Sir,

By the 1st of March 2013, the Agency shall receive ENTSO-E Network Code on Operational Security, including its supporting documents.

Pursuant to Article 6(7) of Regulation (EC) No 714/2009, ACER shall provide a reasoned opinion on the network code within a period of three months. This opinion shall assess the compliance of the network code with the Framework Guidelines on Electricity System Operation adopted by the Agency on 2 December 2011.

Considering the substantial changes made to the network code following the public consultation held by ENTSO-E and in order to ensure transparency and full involvement of stakeholders, as early as possible in the process, the Agency organises a workshop in Ljubljana on 9 April 2013, from 12.00 to 16.30, to collect stakeholders' views on the Network Code on Operational Security and its supporting documents. This workshop shall give the opportunity for European-wide associations representing members who have a direct stake in the context of the Network Code on Operational Security to present their views on this network code and its supporting document.

A workshop programme will be available online as soon as possible. Please consult ACER web page from time to time to get the latest updates.

Stakeholders who wish to attend the workshop are kindly requested to [register](#) as soon as possible and no later than noon, 31 March 2013.

Best regards,

Alberto Pototschnig
Director
ACER – The Agency for the Cooperation of Energy Regulators
