

PRESS RELEASE No 2/19

Ljubljana, 19/07/2019

The Board of Appeal dismissed appeals brought against

**ACER Decision on common capacity calculation methodologies in the Core
CCR region**

On 23 April 2010, the Board of Appeal received appeals brought by Amprion GmbH ('Amrion'), Transnet BW GmbH ('Transnet') as well as by Bundesnetzagentur ('BnetzA'), National Regulatory Authority (NRA) of Germany, seeking annulment of ACER Decision No. 02/2019 on the Core Capacity Calculation Region (CCR) proposals made by Transmission System Operators (TSOs) for the regional design of the day-ahead and intraday common capacity calculation methodologies.

The appeals have been registered respectively under case numbers A-001-2019 (Amprion), A-002-2019 (Transnet) and A-003-2019 (BnetzA). Two appeals, A-001-2019 and A-002-2019, were merged into A-001-2019 (consolidated).

After careful consideration of the merits and hearing of the parties and an expert-witness, the Board of Appeal found the appeals unfounded.

The non-confidential version of the final decisions of the Board of Appeal were published on the website of the Agency on 18 July 2019.
