

# Proposals for amendments to the Requirements for Generators

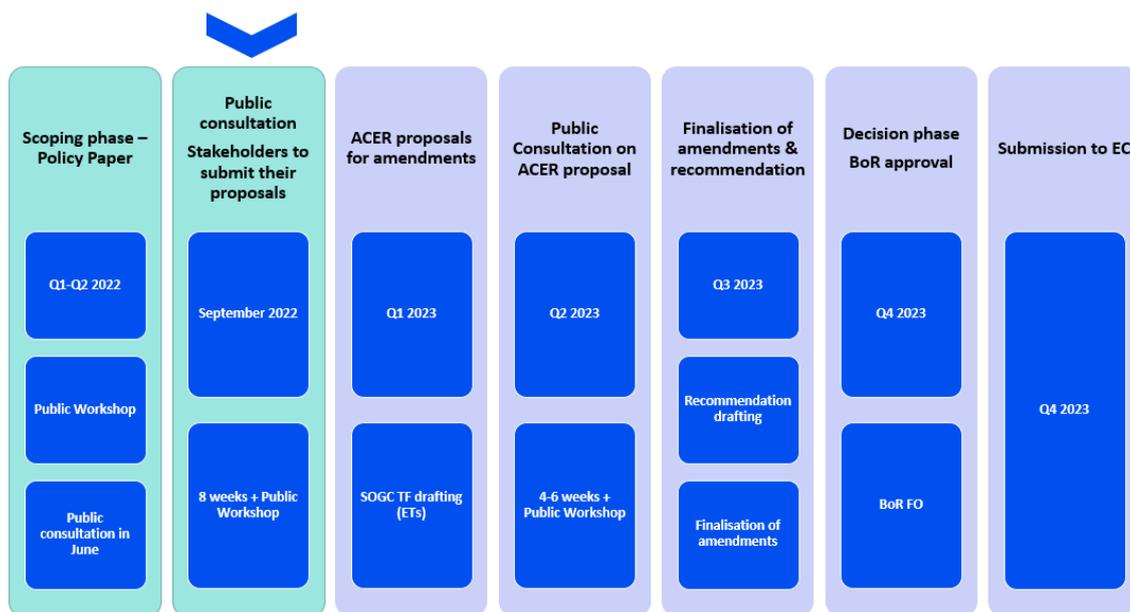

Fields marked with \* are mandatory.

## Introduction

---

Important developments in the policies of decarbonisation of the European Union (EU) energy and transport sectors have taken place since the inception of the development of the first European Grid Connection Network Codes (GC NCs) in 2012.

In the framework of the Grid Connection European Stakeholder Committee (GC ESC), the European Commission proposed for ACER to initiate the process towards the amendment of the existing GC NCs in September 2022. The amendment process, as presented to the GC ESC is outlined in the Figure below:

Following the scoping phase, ACER published the Policy Paper on the revision of the network code on requirements for grid connection of generators and the network code on demand connection in September 2022. The Policy Paper aims to transparently indicate to stakeholders the key policy areas in which amendments are to be expected. Moreover, the Paper draws on the alternative policy options and provides recommendations and proposed actions for the amendment process.

[Access the ACER Policy Paper on the revision of the NC RfG and NC DC](#)

This consultation aims at gathering, from all interested stakeholders, concrete proposals for amendments to the Commission Regulation (EU) 2016/631 of 14 April 2016 establishing a **Network Code on Requirements for Grid Connection of Generators** ('NC RfG').

For amendment proposals concerning Network Code on Demand Connection, please go to the form: [NC DC](#).

**Responses to this consultation should be submitted by 21 November 2022 23:59 CET.**

ACER is highly committed in processing personal data in a lawful way.

Find out more how we process your data: <https://www.acer.europa.eu/the-agency/about-acer/data-protection>

\* Name of the stakeholder:

GENELEC TC8X

\* Contact person:

[REDACTED]

\* Contact person's email address:

[REDACTED]

\* Country of the stakeholder's headquarters or main country of operation:

Belgium

\* Type of the stakeholder:

- Generator (including association)
- Consumer (including association)
- Transmission system operator (including association)
- Distribution system operator (including association)
- Manufacturers (including association)
- Academia/research institution
- Regulatory authority
- Other (please, elaborate)

Please, elaborate on your answer above, if necessary:

GENELEC is a European standardisation body including many stakeholders of generator, consumer, TSO, DSO Academia

\* Do you consent to the publication of the stakeholder's name?

- Yes
- No

\* Do you consent to the publication of provided answers?

- Yes
- No (please, note that your answer, without your name and organization, may be shared with the EU institutions and national authorities, drafting team members, and other persons or entities involved in the European Grid Connection Network Codes amendment process)

## Instructions

---

Stakeholders are invited to submit their amendment proposals to the RfG articles that they consider should be revised in a two-step process:

1. by inserting the proposed amendments in the provided Word file
2. by motivating/reasoning the proposed amendments through this online consultation form.

**Both steps are mandatory for all amendment proposals.**

(Where no amendment is proposed, the article text in the word file can be left unaltered and the cells in the consultation form can be left blank.)

The mandatory steps for submitting amendment proposals are detailed below. At the end of this section, you can find an example showing how to submit your proposals.

### ***Step 1***

Please include all your amendment proposals in the **Word file provided below using the Track Changes mode**. Once you edit the file and rename it with your stakeholder's name ("NC\_RfG\_stakeholder\_name"), please upload it in the last section of this form (FILE UPLOAD)

### **[Download the Word file \(NC RfG\)](#)**

---

### ***Step 2***

In addition, please use this form to motivate/reason your proposals, following the instructions:

## General requirements for type B power-generating modules

Please write your amendment proposal and the reasoning in the table below.

	Amendment proposal	Reasoning	Relation to other provisions
Article 14(1)	1	2	3
Article 14(2)			
Article 14(3)			
Article 14(4)			
Article 14(5)			

Please write your amendment proposal and the reasoning in the table below.

	Proposal for new provisions in this section	Reasoning	Relation to other provisions
4	New provisions		

Please upload your file if necessary

The maximum file size is 1 MB

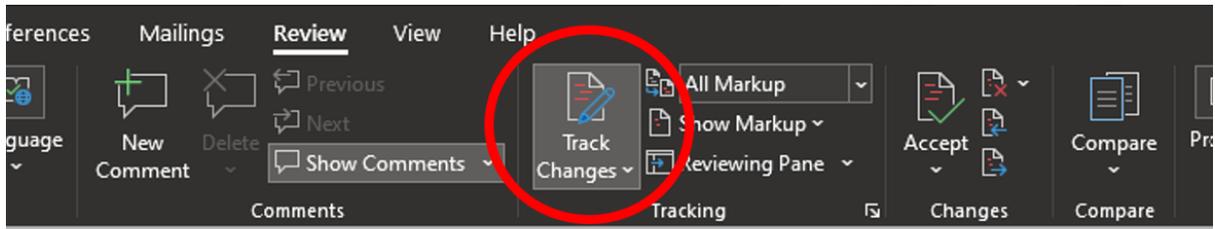

5 Select file to upload

1. Propose an amended wording of the relevant provision, as you provided in the Word file.
2. Provide the motivation/reasoning behind your proposal.
3. Indicate (if any) which other provisions of the NC RfG are impacted and may need to be amended following your proposal.
4. Provide (if any) your proposals for adding new provisions to the relevant section of the Regulation, as you provided in the Word file.
5. Upload figures or tables if necessary; text inputs should be provided directly in the consultation form.

---

### *Example*

Stakeholder XYZ would like to propose an amendment to Article 27 of NC RfG. In their view, the meaning of the word "respectively" in this article is not clear. Following a two-step process, the stakeholder downloads the Word file from the **Instruction** section, turns on the Track Changes mode and edits the text (first step).

*Article 27*

**System restoration requirements applicable to AC-connected offshore power park modules**

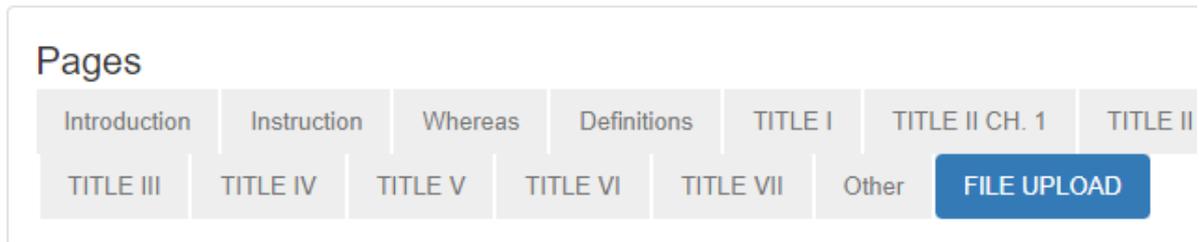

The system restoration requirements laid down respectively in Article 14(4) and Article 15(5) shall apply to AC-connected offshore power park modules types B and C, respectively.

*Article 28*

**General system management requirements applicable to AC-connected offshore power park modules**

The general system management requirements laid down in Article 14(5), Article 15(6) and Article 16(4) shall apply to AC-connected offshore power park modules.

After saving the edited file on their device under the name "NC\_RfG\_Stakeholder\_XYZ", the stakeholder uploads it in the **FILE UPLOAD** section.

## FILE UPLOAD

Please upload the Word file (downloaded from the *Instruction* section) containing all your amendments

The maximum file size is 1 MB

 NC\_RfG\_Stakeholder\_XYZ.docx

Select file to upload

Previous

Submit

The stakeholder proceeds to motivate/reason their proposal. As they would like to propose an amendment to Article 27 of NC RfG, they enter **TITLE II CHAPTER 4** Section and insert the proposed amended wording and the reasoning (second step). As the proposed amendment of Article 27 does not affect other provisions, they leave the last column blank.

## Pages

Introduction	Instruction	Whereas	Definitions	TITLE I	TITLE II CH. 1	TITLE II CH. 2	TITLE II CH. 3	TITLE II CH. 4
TITLE III	TITLE IV	TITLE V	TITLE VI	TITLE VII	Other	FILE UPLOAD		

## TITLE II CHAPTER 4 - Requirements for offshore power park modules

---

Please write your amendment proposal and the reasoning in the table below.

	Amendment proposal	Reasoning	Relation to other provisions
Article 23	//	//	//
Article 24	//	//	//
Article 25	//	//	//
Article 26	//	//	//
Article 27	The system restoration requirements laid down in Article 14(4) and Article 15(5) shall apply to AC-connected offshore power park modules types B and C, respectively.	The current wording of Article 27 refers to the provisions of Articles 14(4) and 15(5). However, it is unclear from the legal text how the respective application should be understood. Indicating that the requirements of Article 14(4) shall apply to offshore PPMs type B and requirements of Article 15(5) shall apply to offshore PPMs type C follows the internal logic of the NC RfG and corresponds with the capabilities of the units in question.	//
Article 28	//	//	//

As the survey is long,

1. you have the possibility to edit your answer after submission. When clicking on "submit", you will be given a contribution ID, which you can then use to access your contribution here. This allows you to proceed in steps.
2. we kindly suggest that you download the entire survey as .pdf (link on the right), prepare your answers and then upload them at once in the EU Survey Tool, to avoid a session timeout on submission.

The maximum length of each cell is 5000 characters. This is the maximum technical limit set by the EUsurvey tool, which cannot be increased.

## Whereas Section

---

Please write your amendment proposal and the reasoning in the table below.

## TITLE II CHAPTER 1 - General Requirements

---

**General requirements for type A power-generating modules**

Please write your amendment proposal and the reasoning in the table below.

	Amendment proposal	Reasoning	Relation to other provisions
Article 13(1)	<p>For the definition of non-exhaustive requirements European standards shall be considered if available.</p> <p>Rephrase first paragraph of 1 (b) to: With regard to the rate of change of frequency withstand capability, a power-generating module shall be capable of staying connected to the network and operate at rates of change of frequency up to a value specified by the relevant TSO based on European Standards if available , unless disconnection was triggered by rate-of-change-of-frequency-type loss of mains protection. The relevant system operator, in coordination with the relevant TSO, shall specify this rate-of-change-of-frequency-type loss of mains protection.</p>	<p>To strengthen harmonisation in the single market and speed up the energy transitions.</p>	<p>non</p>
	<p>1. Modification: For the definition of non-exhaustive requirements European standards shall be considered if available.</p> <p>Rephrase 2 (a) to: the power-generating module shall be capable of activating the provision of active power</p>		

<p>Article 13(2)</p>	<p>frequency response according to figure 1 at a frequency threshold and droop settings specified by the relevant TSO based on European Standards if available;</p> <p>2. Modification: (f) Regarding LFSM-O, consider the requirement to switch from discharging to charging if needed, corresponding to the droop - Article 13(2)(f), new section (iii). Rephrase 2 (f) to: the relevant TSO may require that upon reaching minimum regulating level, the power-generating module be capable of either: (i) continuing operation at this level; or (ii) further decreasing active power output; (iii) in case of energyelectrical energy storage modules in discharging mode at the beginning the event, these shall be capable of switching to charging mode if needed corresponding to the droop.</p> <p>3. Modification: (h) Include LFSM-U only for energy storage modules including a requirement to switch from</p>	<p>1. Modification: To strengthen harmonisation in the single market and speed up the energy transitions.</p> <p>2. Modification: Energy storage can provide a large contribution to LFSM-O with little extra cost and have an increasing significance for the power system. This is considered state of the art and already considered in several national implementations of NC RfG for example VDE-AR-N 4105 in Germany and the European Standard EN 50549.</p> <p>3. Modification: Electrical Energy storage have an increasing significance for the power system and can provide a large contribution to LFSM-U with little extra cost . This is considered state of the art and already considered in several national implementations of NC RfG for example VDE-AR-N 4105 in Germany CEI-21 in Italy, and the European Standard EN 50549.</p>	<p>1. Modification: n.a.</p> <p>2. Modification: n.a.</p> <p>3. Modification: LFSM-U provision in Article 14 and Article 15 NC RfG.</p>
----------------------	---	--	---

	<p>charging to discharging when needed, corresponding to the droop - Article 13(2) new section (h).</p> <p>See attached file  NC_RfG_WG03_Proposals.docx  for legal text.</p>
