Composite Assessment report on potential conflicts of interest

2025

This report provides an assessment of the Declarations of Interests (“DoI”) and curricula vitae (“CVs”) submitted by the members and alternates of the Board of Appeal (“BoA”) of the European Union Agency for the Cooperation of Energy Regulators (“Agency”) in order to comply with their obligation to act independently when carrying out their duties. The report also confirms that the Declarations of Commitment (“DoC”) were duly submitted by all members and alternates of the BoA. The purpose of the assessment is to raise awareness and help identify possible situations of conflict of interest so that these can be avoided and addressed at an early stage.

The assessment has been carried out taking into account the criteria set out in Decision AB N^o. 02/2015 of the Administrative Board of the Agency of 31 January 2015 laying down a policy for the prevention and management of conflicts of interest, namely: family ties, financial investments in any relevant commercial entity (including any investment in the energy sector) and other potential interests including, among others, professional relationships such as employment and consultancy, membership of a managing body or advisory body, other memberships or affiliations.

The assessment has been carried out taking into account also Decision No 16/2022 of the Administrative Board of the Agency of 14 December 2022 laying down the Guidelines on the prevention and management of conflicts of interest for the Administrative Board and the Board of Appeal of the Agency.

This report has been established, as regards the members other than Chairman and Vice Chairman, by the Chairman, the Vice Chairman, and the Member designated for that purpose by the Board, as regards the Chairman by the Vice Chairman, the Member and the Alternate Member designated for that purpose by the Board, and as regards the Vice Chairman by the Chairman and the designated Member and Alternate Member (“Panel”).

Board of Appeal

Further to the assessment and according to the above decisions, one of the following risk levels have been assigned to each member and alternate of the BoA:

- **Level 1:** No relevant interests declared.
- **Level 2:** Relevant interests declared (e.g., in the energy sector) but which do not have any (and are not expected to have any for the year following the declaration) direct influence on the general decision-making process of the BoA or which are not directly impacted by the BoA’s general decision-making process. As regards case proceedings, potential situations of conflict of interest will be reviewed on a case by case basis.
- **Level 3:** Interests declared pertaining directly to the field of competence of the BoA and leading to a systemic conflict of interest.

The Panel applied “Level 1” risk level where the member or alternate had declared no relevant interest or no current relevant interest. The panel identified different types of involvement in Category I of the DoI form (employment, consultancy, legal representation or advice): members/alternates who are involved in the work of an NRA and others who have activities as private providers (for example as consultants and private legal practitioners). The categories of interest declared can be found in the table below:

Name	I. Employment	II. Body membership	III. Other membership	IV. Research	V. Investment	VI. Other
Prek						
Eeckhout						
Sardi						
Widegren						
Marien						
O’Brien						
Partanen						
Petruzzo						
Stritof						
Szörenyi						

While these interests are relevant, however, none of them has a direct influence on the general decision-making process of the BoA. Therefore, the Panel assessed all members and alternates
