REMIT guide for large energy consumers

This document is for information purposes only. For comprehensive understanding of obligations, legal requirements and reporting instructions, consult official legal texts and ACER documents.

Does REMIT reporting apply to you?

Being a large energy consumer does not automatically trigger REMIT reporting obligations. These can apply if:

- You trade wholesale energy products or hold trading positions (exposures).
- Your consumption capacity or trading positions reach 600 GWh/year or more.
- You hold market-sensitive inside information.

Your reporting obligations

- **Transactions:** supply, storage and transportation, unless concluded on an organised marketplace.
- **Exposures:** quarterly trading positions; production and consumption forecasts (upon request and if applicable).
- **Inside information:** public disclosure.

Key dates

- **Until 29 October 2027:** continuous reporting of supply transactions.
- **From 29 October 2027:** periodic reporting of supply transactions.
- **From 31 October 2027:** exposures reporting.

What's next?

1 Know the rules

Check if your activities fall under REMIT and its Implementing Regulation on data reporting.

2 Register

Follow ACER's manual to register as a market participant.
REMIT can also apply to non-EU/EEA entities.

3 Prepare for reporting

- Read ACER's guide on who reports & how to set up your reporting.
- Select a registered reporting mechanism or inside information platform to report your data to ACER.
- Verify the completeness, accuracy and timeliness of your data.

4 Use ACER guidance

Browse ACER's REMIT documents for guidance:

- TRUM: technical reporting
- Guideline: policy and definitions
- Electronic formats: actual data transmission
