

Response

on the Public Consultation Paper PC_2015_R_03 Regarding a Common Schema for the Disclosure of Inside Information under REMIT

Box 1: Questions related to the proposed schemas

1. Would you add any other field not included in the current proposal? If so, please explain your reasoning.

No

2. Would you remove any field represented in the current proposal? If so, please explain your reasoning.

No

3. Would you change any of the descriptions, accepted values or applicability? If so, please explain your reasoning. Are the schemas or values that you are suggesting based on any industry standard? Which one(s)?

No

Box 2: Question related to the implementation of web feeds

4. Do you agree with the use of RSS or ATOM feeds to fulfil the requirement under Article 10(1) of the REMIT Implementing Regulation?

In fact AGGM publishes UMMs on “CEGH REMIT platform for publication of inside information” (<https://www.qashub.at/remit/content/postings.xhtml>). As far as this platform will support RSS or ATOM feeds we agree with the use of such functionality.

AGGM Austrian Gas Grid Management AG
