

STRENGTHENING EU SECURITY OF SUPPLY

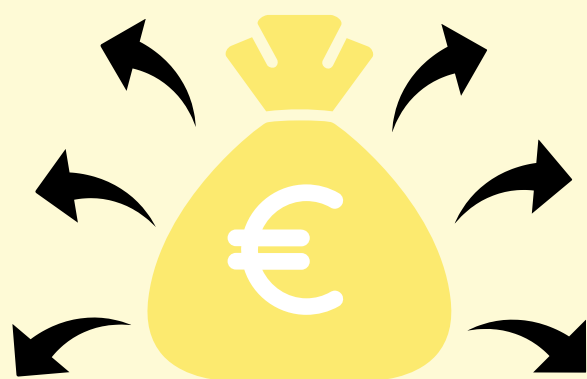

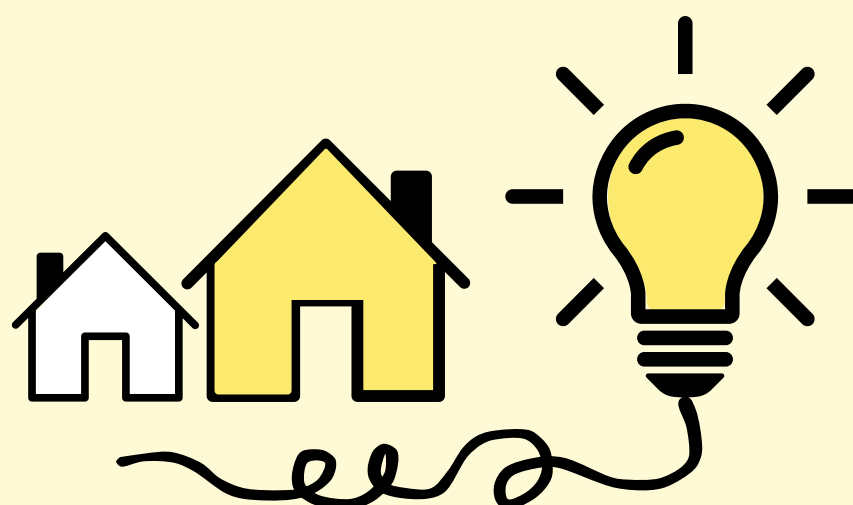

⚡ Electricity

📄 REPORT

2025 Monitoring Report

20.11.2025

The EU's interconnected
power market helps
keep the lights on.

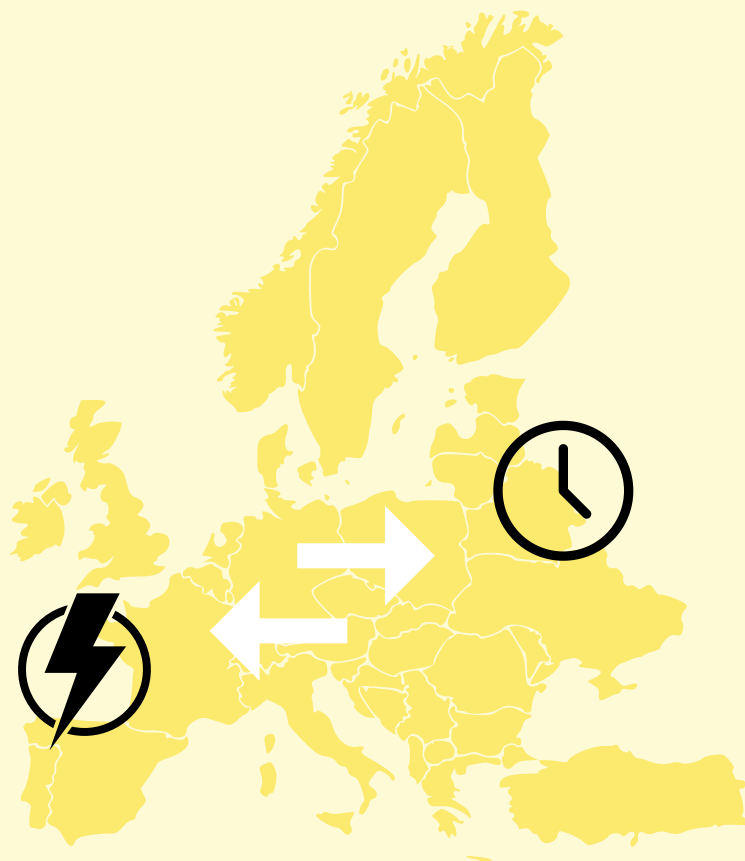

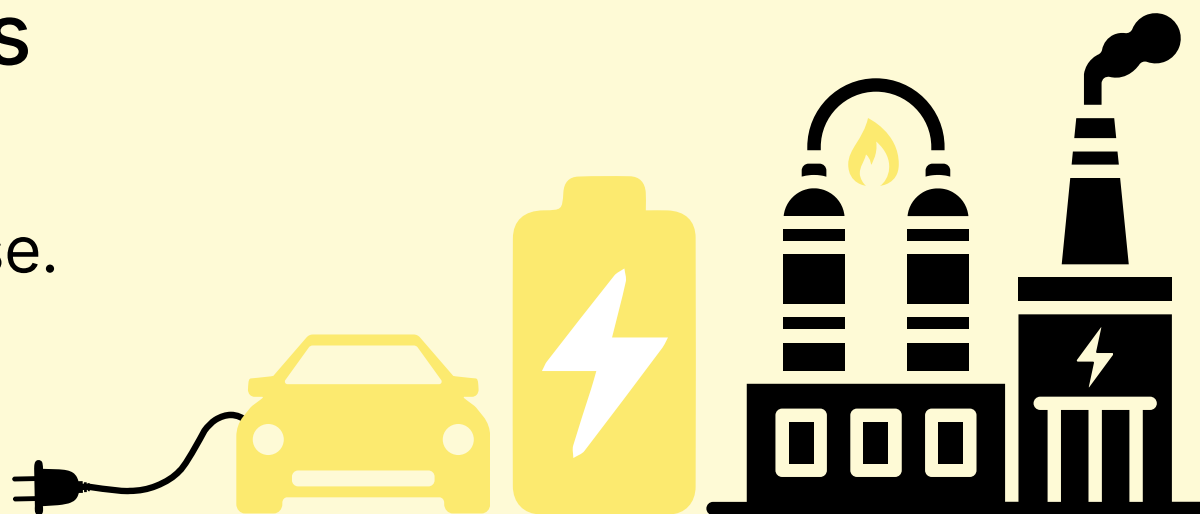

~ €11 bn spent EU-wide

on almost 40 different
security-of-supply support
measures in 2024.

Capacity mechanisms can come in different forms

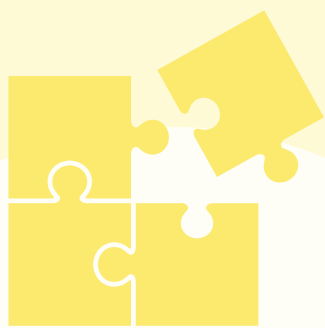

e.g. gas-powered plants,
batteries or demand response.

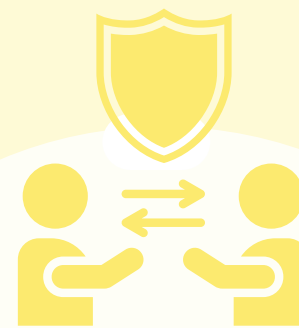

1 h 45 min

average disconnection time
in 2024 across the EU (no
cases due to inadequate
electricity supply).

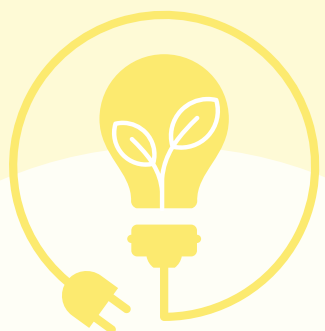

ACER RECOMMENDATIONS

**Coordinate
capacity planning
at EU level**

**Strengthen regional
cooperation on risk
preparedness**

**Make capacity
mechanisms cleaner
and more efficient**

**Better align capacity
mechanisms and
flexibility measures**
