APPROVAL BY THE SEE CCR REGULATORY AUTHORITIES AGREED AT THE SEE CCR ENERGY REGULATORS’ REGIONAL FORUM

OF

THE SEE CCR TSO PROPOSAL FOR FALLBACK PROCEDURES

18 April 2018
I. Introduction and legal context

This agreement of the SEE CCR Regulatory Authorities shall provide evidence that a decision on fallback procedures does not, at this stage, need to be adopted by ACER pursuant to Article 9(11) of Regulation 2015/1222. It is intended to constitute the basis on which the SEE CCR Regulatory Authorities will each subsequently make national decisions pursuant to Article 9(10) of Regulation 2015/1222 to approve the proposal for fallback procedures, submitted by SEE CCR TSOs in line with Article 44 of Regulation 2015/1222.

The legal provisions that lie at the basis of the fallback procedures, and of this SEE CCR Regulatory Authority agreement on the fallback procedures, can be found in Article 3, 8, 9, and 44 of Regulation 1222/2015. They are set out here for reference.

Article 3 of Regulation 2015/1222

This Regulation aims at:

(a) Promoting effective competition in the generation, trading and supply of electricity;
(b) Ensuring optimal use of the transmission infrastructure;
(c) Ensuring operational security;
(d) Optimising the calculation and allocation of cross-zonal capacity;
(e) Ensuring fair and non-discriminatory treatment of TSOs, NEMOs, the Agency, regulatory authorities and market participants;
(f) Ensuring and enhancing the transparency and reliability of information;
(g) Contributing to the efficient long-term operation and development of the electricity transmission system and electricity sector in the Union;
(h) Respecting the need for a fair and orderly market and fair and orderly price formation;
(i) Creating a level playing field for NEMOs;
(j) Providing non-discriminatory access to cross-zonal capacity

Article 8 of Regulation 2015/1222

TSOs’ tasks related to single day-ahead and intraday coupling

1. In Member States electrically connected to another Member State all TSOs shall participate in the single day-ahead and intraday coupling.

2. TSOs shall:

   […]

   (i) establish and operate fallback procedures as appropriate for capacity allocation in accordance with Article 44;

Article 9 of Regulation 2015/1222
1. TSOs and NEMOs shall develop the terms and conditions or methodologies required by this Regulation and submit them for approval to the competent regulatory authorities within the respective deadlines set out in this Regulation. Where a proposal for terms and conditions or methodologies pursuant to this Regulation needs to be developed and agreed by more than one TSO or NEMO, the participating TSOs and NEMOs shall closely cooperate. TSOs, with the assistance of ENTSO for Electricity, and all NEMOs shall regularly inform the competent regulatory authorities and the Agency about the progress of developing these terms and conditions or methodologies.

[...]

5. Each regulatory authority shall approve the terms and conditions or methodologies used to calculate or set out the single day-ahead and intraday coupling developed by TSOs and NEMOs. They shall be responsible for approving the terms and conditions or methodologies referred to in paragraphs 6, 7 and 8.

[...]

7. The proposals for the following terms and conditions or methodologies shall be subject to approval by all regulatory authorities of the concerned region:

[...]

e) the fallback procedures in accordance with Article 44;

[...]

[...]

9. The proposal for terms and conditions or methodologies shall include a proposed timescale for their implementation and a description of their expected impact on the objectives of this Regulation. Proposals on terms and conditions or methodologies subject to the approval by several or all regulatory authorities shall be submitted to the Agency at the same time that they are submitted to regulatory authorities. Upon request by the competent regulatory authorities, the Agency shall issue an opinion within three months on the proposals for terms and conditions or methodologies.

10. Where the approval of the terms and conditions or methodologies requires a decision by more than one regulatory authority, the competent regulatory authorities shall consult and closely cooperate and coordinate with each other in order reach an agreement. Where applicable, the competent regulatory authorities shall take into account the opinion of the Agency. Regulatory authorities shall take decisions concerning the submitted terms and conditions or methodologies in accordance with paragraphs 6, 7 and 8, within six months following the receipt of the terms and conditions or methodologies by the regulatory authority or, where applicable, by the last regulatory authority concerned.

[...]

12. In the event that one or several regulatory authorities request an amendment to approve the terms and conditions or methodologies submitted in accordance with paragraphs 6, 7 and 8, the relevant TSOs or NEMOs shall submit a proposal for amended terms and conditions or methodologies for approval within two months following the requirement from the regulatory authorities. The competent regulatory authorities shall decide on the amended terms and conditions or methodologies within two months following their submission. Where the competent regulatory authorities have not been able to reach an agreement on terms and conditions or methodologies pursuant to paragraphs (6) and (7) within the two-month deadline, or upon their joint request, the Agency shall adopt a decision concerning the amended terms and conditions or methodologies within six months, in accordance with Article 8(1) of Regulation (EC) No 713/2009. If the relevant TSOs or NEMOs fail to submit a proposal for amended terms and conditions or methodologies, the procedure provided for in paragraph 4 of this Article shall apply.
14. TSOs and NEMOs responsible for establishing the terms and conditions or methodologies in accordance with this Regulation shall publish them on the internet after approval by the competent regulatory authorities or, if no such approval is required, after their establishment, except where such information is considered as confidential in accordance with Article 13.

Article 44 of Regulation 2015/1222

By 16 months after the entry into force of this Regulation, each TSO, in coordination with all the other TSOs in the capacity calculation region, shall develop a proposal for robust and timely fallback procedures to ensure efficient, transparent and non-discriminatory capacity allocation in the event that the single day-ahead coupling process is unable to produce results. The proposal for the establishment of fallback procedures shall be subject to consultation in accordance with Article 12.

II. The SEE CCR TSO proposal

The proposal for fallback procedures was consulted by the SEE CCR TSOs through ENTSO-E from 1 March 2017 to 31 March 2017, in line with Article 44 and Article 12 of Regulation 2015/1222. The SEE CCR TSOs’ proposal for fallback procedures, dated April 2017, was received by the last Regulatory Authority of the SEE CCR on 15 June 2017. Article 9(10) of Regulation 2015/1222 requires SEE CCR Regulatory Authorities to consult and closely cooperate and coordinate with each other in order to reach agreement and make decisions within six months following receipt of submissions of the last Regulatory Authority concerned. A decision was therefore required by each SEE CCR Regulatory Authority by 15 December 2017. On 12 December 2017, the SEE CCR Regulatory Authorities at the SEE CCR Energy Regulators’ Regional Forum unanimously agreed to request an amendment to the fallback procedures submitted by SEE CCR TSOs. On this basis, each SEE CCR Regulatory Authority sent the request for amendment to their respective TSO.

The amended SEE CCR TSOs’ proposal for fallback procedures was received by the last Regulatory Authority of the SEE CCR on 23 February 2018. Therefore, according to Article 9(12) of Regulation 2015/1222, a decision is required by each SEE CCR Regulatory Authority by 23 April 2018.

The SEE CCR TSOs’ amended proposal for fallback procedures covers the following:

a) Fallback Procedure on Romania-Bulgaria (RO-BG) interconnection; and
b) Fallback Procedure on Bulgaria-Greece (BG-GR) interconnection.

The Fallback Procedure on each interconnection is based on explicit day ahead auctions, the Shadow Auctions. The auction specification of a Shadow Auction on a specific interconnection for the contract day will be published by the Allocation Platform in advance according to the Shadow Allocation Rules. The Allocation Platform which will perform the Shadow Auctions for the RO-BG interconnection is Transelectrica and for the BG-GR interconnection is JAO.

SEE NEMOs performing MCO function shall inform SEE TSOs in the event of risk of Full or Partial decoupling. In the event of Full decoupling, the Fallback Procedure on both interconnections is initiated. In the event of Partial decoupling affecting the RO-BG (or BG-GR respectively) interconnection, the Fallback Procedure on RO-BG (or BG-GR respectively) interconnection is initiated.

1 https://consultations.entsoe.eu/markets/see-fallback/
If a Fallback Procedure cannot be implemented in time, the Shadow Auction will be postponed. If postponement of a Shadow Auction is not considered by the Allocation Platform as being possible, the Shadow Auction will be cancelled and all bids already submitted will automatically be deemed null and void, based on objective grounds and in compliance with Shadow Allocation Rules. When the Single Day Ahead Market Coupling Process is declared failed and the relevant border Fallback Procedure is also cancelled, the daily offered capacity is allocated to the subsequent relevant intraday allocation processes on that border.

Following the introduction of the Single Day Ahead Coupling process on each border within SEE CCR any change of the Shadow Allocation Rules and/or the Allocation Platform performing the Shadow Auctions related to this border shall lead to a request for amendment of the present SEE CCR Fallback Procedure, according to Article 9(13) of the Regulation 2015/1222.

The Fallback Procedures shall be implemented after SEE NRAs approval and on the interconnection of the SEE CCR immediately after the day ahead market MCO function becomes operational on that respective interconnection according to Article 7(3) of the Regulation 2015/1222.

### III. SEE CCR Regulatory Authority position

**On the first SEE CCR TSOs’ proposal for fallback procedures.**
The SEE CCR Regulatory Authorities agreed to request an amendment by the SEE CCR TSOs to the proposal for the fallback procedures. The basic elements requested by the SEE CCR Regulatory Authorities to be amended were:

1. To specify the Allocation Platform(s) and the fees paid by the participants.
2. To provide an Annex with the Shadow Allocation Rules and to foresee that a change in the Shadow Allocation Rules will result in a request for amendment of the fallback procedures.
3. To describe precisely the procedure, timing and communication channel that will be used by the SEE NEMOs performing MCO function to inform SEE TSOs on any potential problem for delivering the results.
4. To specify the time of initiating a Shadow Auction and the time of publication of the Shadow Auctions results.
5. To describe the procedure followed in the case a Shadow Auction is cancelled.
6. To set an implementation date for each interconnection in the SEE CCR.
7. To assign the specific roles and responsibilities of the parties involved in the fallback procedures.
8. To delete any reference to the word “proposal”, when the reference is on the “methodology”.

**On the amended SEE CCR TSOs’ proposal for fallback procedures.**
After assessing the amended version of the fallback procedures submitted by the SEE CCR TSOs, the SEE CCR Regulatory Authorities acknowledge that their requests have been fulfilled. In case there is a new version of the Shadow Allocation Rules, following the referred version 1.3, SEE CCR Regulatory Authorities expect the SEE CCR TSOs’ proposal for fallback procedures to be amended, according to Article 9(13) of the Regulation 2015/1222.

**Conclusions**
The SEE CCR Regulatory Authorities have assessed, consulted and closely cooperated to reach an agreement on the amended proposal for the fallback procedures submitted by the SEE CCR TSOs. On 18 April 2018, the SEE CCR Regulatory Authorities agreed that the amended SEE CCR fallback procedures meet the requirements of Regulation 2015/1222 and as such can be approved.
SEE CCR Regulatory Authorities must therefore make their decisions by 23 April 2018, on the basis of this agreement in accordance with the two months deadline as set out in the Regulation 2015/1222. Following national decisions taken by each Regulatory Authority, SEE CCR TSOs will be required to publish the methodology on the internet in line with Article 9(14) of Regulation 2015/1222.
